

# Conversion Workshops

Decision Intelligence is only as powerful as the people using it. Because of that, Pyramid Analytics made a commitment to helping our customers get the most value from their investment. We have innovative ideas, exciting solutions, and useful resources to help you elevate your decision-making.

We are offering a new service personalized for your company. If you are using other BI Tools in addition to Pyramid, our **Conversion Workshops** will show you the value of using a single platform throughout your organization.

To find out if you will benefit from this workshop, answer the following questions:

1

Have you observed your organization's administrative and infrastructure resource requirements for another BI tool grow over time?

2

Does your organization face detrimental limitations on query speed or scope (data sources) from your current BI tool?

3

Are your organization's users tempted to download local copies of data from your BI tool to the desktop for further analysis in Excel?

4

Do users encounter obstacles to self-service data discovery and reporting? Do they often wait for help from someone in IT or on a dedicated analytics team?

If you answered yes to any of the questions above, it is time to schedule a **Conversion Workshop**. We are confident that once you participate in the workshop, you will see the value of using a single platform throughout your organization. Our team will then support you with your conversion to the Pyramid Decision Intelligence Platform for all your analytics needs, quickly and efficiently.
