

Data Insights in a Day

Decision Intelligence is only as powerful as the people using it. Because of that, Pyramid Analytics made a commitment to helping our customers get the most value from their investment. We've got new ideas, exciting solutions, and useful resources to help you elevate your decision-making.

We are offering a new webinar personalized for your company. Data Insights in a Day can help your organization extend the value of our platform internally by providing quick, easy, efficient visual analytics for a specific use case.

How it works:

1

You refer a colleague that currently does not use Pyramid Analytics

2

We set up a short introductory call, where we brainstorm on use cases

3

Once a use case is identified, they provide us with a data set

4

We set up a time, and send out invitations to as many people as possible

5

We demonstrate the use case, answer any questions, and build your customized content

6

As a thank you, we will send you a gift card of your choice

We are confident that once we address a new, unique business challenge, it will increase employee productivity, and give you a tool to make better decisions moving forward.
