Internal User Group

Decision Intelligence is only as powerful as the people using it. Because of that, Pyramid Analytics made a commitment to helping our customers get the most value from their investment. We've got new ideas, exciting solutions, and useful resources to help you elevate your decision-making.

We are offering a new service to enhance your company's success by providing support to create an **Internal User Group**. As you organize, manage, and run internal user meetings, you will provide the opportunity to connect users within your company and generate excitement around Pyramid's Decision Intelligence platform and its value to your success.

How it works:

1

Collaborate with us to assign a leader from your organization

2

We will work with you to decide on a meeting cadence and choose your first meeting date.

3

Once you have confirmed a date, we will help build out your agenda to have the most impact within your group

4

We can be present at the session to provide updates and answer any questions from your group

5

You can then expand your group to allow others to see the value of the Pyramid Decision Intelligence platform.

We are confident that once this program is up and running, you will find your Pyramid users networking and learning from each other to improve your organization's success, as well as the success of your users.
