# pyramid
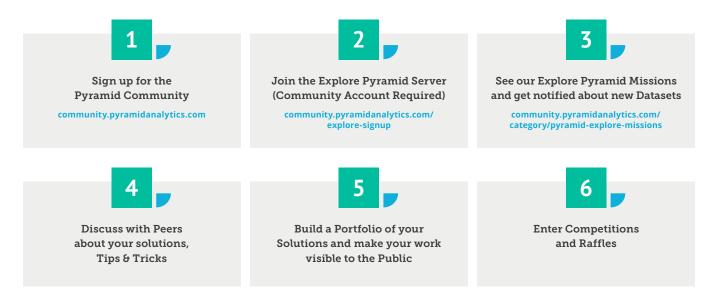

# Explore Pyramid Data Missions

The Explore Pyramid Environment offers a fun and interactive way to flex your analytics muscle. We provide Datasets in a secure environment. Users can access those datasets to solve challenges and play with the Platform. This allows you to work in a risk-free environment, learn from your peers and build a publicly visible portfolio. As you see how others would solve the same task, you improve and get inspired. Joining the Pyramid Challenges is Free for all Pyramid Community Members.

## How it works:

**1**

Sign up for the
Pyramid Community

**community.pyramidanalytics.com**

**2**

Join the Explore Pyramid Server
(Community Account Required)

**community.pyramidanalytics.com/
explore-signup**

**3**

See our Explore Pyramid Missions
and get notified about new Datasets

**community.pyramidanalytics.com/
category/pyramid-explore-missions**

**4**

Discuss with Peers
about your solutions,
Tips & Tricks

**5**

Build a Portfolio of your
Solutions and make your work
visible to the Public

**6**

Enter Competitions
and Raffles

We are confident that your participation will help you to improve your Pyramid Skills and inspire you in your daily work. Exchange with Colleagues from all over the globe drives better adoption in your company and external visibility for your skills.

**For more information, please contact your Community Team (Community@pyramidanalytics.com).**
