

Enablement Day

Decision Intelligence is only as powerful as the people using it. Because of that, Pyramid Analytics made a commitment to helping our customers get the most value from their investment. We've got new ideas, exciting solutions, and useful resources to help you elevate your decision-making.

We are offering a new service personalized for your company. **Enablement Day** can help your organization onboard new users quickly and comfortably, so you can take advantage of the full value of your contracted user seats.

Half of the one-day session helps your future users get started, and then the other half goes over how to work with the data.

How it works:

1

Collaborate with us to find a mutually convenient date for us to schedule a working session.

2

We will offer you curriculum options from which to choose.

3

Once that is done, we provide a form for you to collect use cases, and have employees sign up for the session.

4

We send out invitations to as many people as possible.

5

We present the session, answer any questions, and make sure your group is trained for their use case(s).

6

As a thank you, we will send you a gift card of your choice.

We are confident that once we complete this session, your employees will have learned the Pyramid platform, understand the value of using it, and benefit from executing on their use case.
