

Pyramid User Groups

Pyramid User Groups can be run in a variety of formats. From virtual meetups, through local gatherings to hands-on sessions and workshops. We support you locally to run and organize User Groups, individually in your company, regionally, or virtually. Sharing is the best way to learn:

How it works:

1

Join the Pyramid Community at:
community.pyramidanalytics.com

2

Check for existing meetups & sign up

3

Contact us to start a new local group

4

We support you in organizing an event

5

Grow and exchange with other organizers

6

Become part of the Global Community

We are confident that once you and your colleagues join, you will meet peers that can support your journey and speed up your adoption and quality of reporting. This will help you to make better decisions moving forward and maybe even some real-life friends.

For more information, please contact your Community Team.
